PROFESSIONAL SUMMARY

B.Sc. IT graduate (2026) who builds practical AI tools in Python, including a voice-based AI assistant and a document question-answering system, and uses prompt engineering with Gemini and other LLMs. Completed Google Cloud's Gemini for Google Workspace training and works comfortably with MS Office. Good written and spoken English, looking to apply AI tools to real business tasks as an AI Intern.

TECHNICAL SKILLS

AI Tools: Google Gemini (API and Google Workspace), Claude, Claude Code, Codex, Ollama, Llama 3, Groq API
Prompt Engineering and LLMs: Prompt Engineering, LLM Integration, RAG, Chatbot and Voice Assistant Development, AI Text Generation
Technical: Python, FastAPI, Django, Streamlit, REST APIs, React (basic)
Office and Workspace: MS Word, MS PowerPoint, MS Excel, Google Workspace
Data: Pandas, NumPy, Data Cleaning
Tools: Git, GitHub, VS Code
Professional Skills: Good English Communication, Technical Documentation, Quick Learner
Ready to Learn: Content Automation, Digital Marketing Basics (SEO, Meta Ads, Google Ads)

RELEVANT INTERNSHIP EXPERIENCE

AI/Data Science Intern – IBM SkillsBuild *Jan 2025 – Feb 2025*

- Built **NutriFlow AI** (Python, Streamlit), writing prompts for the Google Gemini API to generate personalized meal plans and analyze food images.
- Tested the AI responses, debugged issues, and documented the application workflow.

Python Developer Intern – Edunet Foundation *Jan 2024 – Feb 2024*

- Built a **Fitness Tracker** with Python, Streamlit, and Pandas, processing and visualizing activity data.
- Delivered the project within the 1-month internship under mentor guidance.

SELECTED PROJECTS

Aura Skincare AI Voice Agent | **React, TypeScript, FastAPI, Python, Groq API**

- Built a prototype voice assistant that answers skincare questions and basic mock-order queries, using the Groq API for responses.
- Connected a React frontend to a FastAPI backend and used browser speech recognition and speech synthesis for voice input and output.
- Debugged API errors and model-availability issues.

DocuQuery – RAG-Based PDF Question Answering | **Python, Django, FAISS, Sentence Transformers, Llama 3**

- Built a Django-based system where users upload PDFs and ask questions about their content.
- Implemented text extraction, chunking, embeddings, and FAISS retrieval to find relevant passages.
- Generated answers locally with Llama 3 (via Ollama), using the document's own text as the source.

ResumeIQ – AI-Powered Resume Analyzer | **Python, Django, NLP, Ollama**

- Built a Django application that analyzes resumes using NLP and a locally hosted LLM (Ollama).
- Extracted relevant keywords from resume text to support resume evaluation.

CERTIFICATIONS AND TRAINING

- **Gemini for Google Workspace** — Google Cloud & Simplilearn | Apr 2025
- **Basics of Data Analytics** — Physics Wallah & Microsoft | Apr 2026
- **The Ultimate Job Ready Data Science Course** — CodeWithHarry | Nov 2025
- **Python Crash Course** — Udemy | Aug 2024

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT)
Shree Shankar Narayana College, Mumbai | 2026 | CGPA: 7.67
