PROFESSIONAL SUMMARY

B.Sc. IT graduate (2026) who enjoys finding out how websites work behind the scenes, from how data flows between the frontend and backend to how it is stored. Built web projects with Django, FastAPI, and React, completed two internships, and shares work on GitHub. Strong logical thinking, with a habit of debugging problems step by step and a working knowledge of basic web scraping.

TECHNICAL SKILLS

Web Scraping: BeautifulSoup4, Selenium (basic familiarity), Python
Web Development: HTML5, CSS3, Django, FastAPI, React, TypeScript (project-based)
APIs and Data Flow: REST APIs, JSON, API Integration, Frontend–Backend Integration
Databases: SQL, PostgreSQL, MySQL, SQLite
Data Processing: Pandas, NumPy, Data Cleaning
Tools and Practices: Git, GitHub, VS Code, Debugging, Logical Problem Solving, Technical Documentation

RELEVANT INTERNSHIP EXPERIENCE

AI/Data Science Intern – IBM SkillsBuild *Jan 2025 – Feb 2025*

- Built **NutriFlow AI** (Python, Streamlit), connecting the user interface to backend logic and the Google Gemini API.
- Tested and debugged the application and documented its workflow.

Python Developer Intern – Edunet Foundation *Jan 2024 – Feb 2024*

- Built a **Fitness Tracker** with Python, Streamlit, and Pandas, cleaning, processing, and visualizing activity data.
- Debugged issues and delivered the project within the 1-month internship under mentor guidance.

SELECTED PROJECTS

Aura Skincare AI Voice Agent | **React, TypeScript, FastAPI, Python, Groq API**

- Built a prototype voice assistant with a React and TypeScript frontend and a FastAPI backend, connected through API requests and responses.
- Handled data flow between the frontend, backend, and the Groq API, and used browser speech recognition and synthesis.
- Debugged API errors and model-availability issues.

DocuQuery | **Python, Django, PyMuPDF, FAISS, Sentence Transformers**

- Built a Django-based system where users upload PDFs and ask questions about their content.
- Extracted text from documents, split it into chunks, and retrieved relevant passages with FAISS.
- Debugged PDF-processing and Unicode errors along the way.

ResumeIQ – AI-Powered Resume Analyzer | **Python, Django, NLP, Ollama**

- Built a Django web application that analyzes resumes using NLP and a locally hosted LLM (Ollama).
- Extracted relevant keywords from resume text to support resume evaluation.

CERTIFICATIONS AND TRAINING

- **Basics of Data Analytics** — Physics Wallah & Microsoft | Apr 2026
- **The Ultimate Job Ready Data Science Course** — CodeWithHarry | Nov 2025
- **Gemini for Google Workspace** — Google Cloud & Simplilearn | Apr 2025
- **Python Crash Course** — Udemy | Aug 2024

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT)
Shree Shankar Narayana College, Mumbai | 2026 | CGPA: 7.67
